

A NEW COURSE INF 128 PRINCIPLES OF INFORMATICS

PREPARE FOR YOUR FUTURE IN THE INFORMATION AGE FALL 2011 • GRIFFIN HALL

This **Principles of Informatics** course introduces you to the world of information. You'll learn about the basic principles that underlie this changing world of new smart technologies, social networks and digital transactions. You'll discuss the unique ethical and social issues that arise in this information age. And you'll explore the many opportunities for applying these principles in areas ranging from biology to business, from music to marketing, and from history to health care.

Expand your horizons. Take the informatics perspective. And have fun learning to anticipate and understand future trends in technology and information. **INF 128 is the place to start.**
